

Somaha Brush

Character

High-quality skai material with coarse weave structure. The embossing depth and the excellent harmonized colour printing give the material the appearance of actual weaving.

Technical Properties

Material composition:

approx:	75% PVC-compound
approx:	25% CO-fabric
weight:	780 +/- 50 gr./m ²
thickness:	1,6 +/- 0,2 mm

- long lasting
- abrasion-resistant
- easy-to-clean
- lightfast
- tear-resistant

Application/Processing

Suitable for all kinds of upholsteries and coverings in the upholstery industry, especially the modern living area.

Also suitable for the use in the bags and leather goods industry.

Problem-free processing in the usual procedures (sewing, tacking, sticking, nailing).
Do not use solvent-based adhesives!

Other Instructions

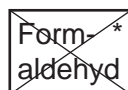

Cleaning:

Simply clean with lukewarm water and a micro-fibre rag. Please do not use solvents, chlorides, abrasives, chemical cleaning agents or wax polishes. Please remove ink stains immediately.

Do not use care agents containing oil or fat.
