

## Palma

### Character

High quality upholstery material with a grain of fine calf leather and a soft print.

### Technical Properties

Material composition: approx: 12% cotton fibre  
 approx: 88% PVC-compound  
 weight: 825 +/- 50 gr./m<sup>2</sup>  
 thickness: 1,25 +/- 0,2 mm

- long durability
- flame retardant
- air and steam permeable
- resistant to disinfectants
- very tear resistant
- resistant to abrasion
- resistant to blood and urine
- easy to clean

### Application/Processing

Recommendable for all kinds of upholsteries and coverings. Particularly recommendable for areas with high demands, e.g. public buildings, gastronomy, hotels, fitness and wellness.

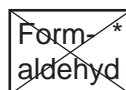

Problem-free processing in all procedures usual in the pad industry (sewing, tacking, sticking, nailing, HF-welding). Do not use solvent adhesives!

### Other Instructions

Recommended Cleaning: Simply clean with warm water and a micro fibre cloth. Please do not use solvents, bleaches, abrasives, chemical detergents or wax polishes. Ink spots have to be removed immediately, do not use care agents for leather containing oil and fat.
