

Palma NF

Character

High quality upholstery material with a fine calf leather grain and a decent print design.

Technical properties

Material composition:

approx:	12% cotton jersey
approx:	88% PVC-compound
weight:	825 +/- 50 gr./m ²
thickness:	1,3 +/- 0,2 mm

- long durability
- flame retardant
- previous to air and steam
- resistant to disinfectants
- very tear resistant
- resistant to abrasion
- expansible
- easy to clean

Application/Processing

Recommendable for all kinds of upholsteries and coverings. Particularly recommendable for the use in public buildings and institutions.

Problem-free processing in all procedures usual in the pad industry (sewing, tacking, sticking, nailing, HF-welding).

Do not use solvent adhesives!

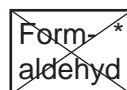

Other Instructions

Recommended Cleaning:

Simply clean with warm water and a micro fibre cloth. Please do not use solvents, bleaches, abrasives or wax polishes. Ink spots have to be removed immediately, do not use care agents for leather containing oil and fat.
