

Paromba

Character

High quality upholstery material with a design-oriented textile structure and a soft Metallic effect.

Technical Properties

Material composition:

approx:	88% PVC-compound
approx:	12% cotton fibre
weight:	825 +/- 50 gr./m ²
thickness:	1,3 +/- 0,2 mm

- long durability
- flame retardant
- expandable
- resistant to disinfectants
- very tear resistant
- resistant to abrasion
- resistant to blood and urine
- easy to clean

Application/Processing

Recommendable for all kinds of upholsteries and coverings. Particularly recommendable for areas with high demands, e.g. public buildings, hotels and gastronomy.

Problem-free processing in all procedures usual in the pad industry (sewing, tacking, sticking, nailing, HF-welding).

Do not use solvent adhesives!

Other Instructions

Recommended Cleaning:

Simply clean with warm water and a micro fibre cloth. Please do not use solvents, bleaches, abrasives, or wax polishes. Ink spots have to be removed immediately, do not use care agents for leather containing oil and fat.
