

Neptun Collection

Character

High quality upholstery material especially for advanced objects and external use, particularly suitable for boats and yachts.

Technical Properties

Material composition:

approx:	2% Nano-hightech-compound
approx:	10% PES-backing
approx:	88% PVC-compound
weight:	860 +/- 60 gr./m ²
thickness:	1,0 - 1,7 mm (dependent on embossing)

- easy to clean
- resistant to UV
- resistant to saltwater
- resistant to oil
- flame retardant
- long durability
- resistant to abrasion
- very tear resistant
- elongation strength
- resistant to disinfectants
- resistant to growth of mildew
- extreme outdoor weathering with novel surfacestructure 'nanoprofile'

Application/Processing

Recommendable for all kinds of upholsteries and coverings in the outdoor section, especially for the external use boats and yachts.

Problem-free processing in all procedures usual in the pad industry (sewing, tacking, sticking, nailing, HF-welding).

Do not use solvent adhesives!

Other Instructions

Recommended Cleaning:

Simply clean with warm water and micro fibre cloth. Please do not use solvents, bleaches, abrasives, chemical detergents or wax polishes.
