

## Flor 66

### Character

High quality upholstery material with a porous cattle leather grain.

### Technical Properties

Material composition:

approx:	12% cotton/PES fabric
approx:	88% PVC-compound
weight:	765 +/- 50 gr./m <sup>2</sup>
thickness:	1,3 +/- 0,2 mm

- long durability
- resistant to abrasion
- tear resistant
- resistant to disinfectants
- good grip
- expandable
- resistant to blood and urine
- easy to clean

### Application/Processing

Recommendable for all kinds of upholsteries and coverings. Particularly recommendable for areas with heavy strain on, e.g. public buildings, hotels, retirement homes and hospitals.

Problem-free processing in all procedures in the pad industry (sewing, tacking, sticking, nailing, HF-welding).

Do not use solvent adhesives!

### Other Instructions

Recommendable Cleaning:

Simply clean with warm water and a micro fibre cloth. Please do not use solvents, bleaches, abrasives, chemical detergents or wax polishes. Ink spots have to be removed immediately, do not use care agents for leather containing oil and fat.
