

WM Cold-Welding Technique for PVC-Floor Coverings

offers 3 unmistakable advantages:

Stands the test for more than 25 years with excellent quality!

The "Legendary Needle"

A metal needle that is mounted firmly in the tube. Guarantees an easy and safe application.

Health Safety

If used properly the products are harmless to your health. Proven through tests done by an independent and accepted specialized institute and published in the "Handbuch Bau-Chemikalien" (construction chemicals' handbook).

Seam Tensile Strength

Very high seam tensile strength - exceeds the values of the European Norms by far. Tested, certified and documented by the "iff-Prüfinstitut für Bau- und Fußbodentechnik".

Our products for a permanent and watertight sealing of seams

Tube Type A
