

PVC welding cord 5 mm for repairing damaged PVC seams

- The repair product system consisting of our welding cord in 5 mm offers first-rate quality to ensure optimum bonding results for all types of homogeneous PVC floor coverings.
- The range consists of 10 basic colours to cover the essential colour shades offered by any PVC flooring manufacturer. For minimum order quantities of 45 rolls, any other colour shade can also be produced in addition to the most frequently used PVC floor coverings.
- The PVC welding cord is completely free of heavy metals; all elements are tested with no health hazards.
- The production guarantees the very best quality, exact product dimensions and use of the best raw materials and packaging.
- An external independent test institute verified excellent technical product performance in early 2006 compared to all competing products, with regard to:
 - ⇒ Very low shrinkage of finished bond
 - ⇒ Highest tension resistance of finished bonded PVC floor covering
